Summary: I am a technology enthusiast, with an analytical mindset. I am currently looking for a new position as a Junior Software Developer on a team building a cutting-edge, web-based data-driven software product.

Experience

Provident Funding Chicago, IL February 2016- August 2017

Software Developer

- Developed a mortgage lending Customer Service Web Application using ASP.NET, C#, SQL, and TFS in an Agile environment while collaborating with team members across the US.
- Fixed bugs with our Customer Service Web Application assigned to me through JIRA by our Customer Service Managers.
- Developed and Maintained a Web Service that sends letters to our mortgage borrowers to make sure the company is in accordance with compliance regulations.

Experian Schaumburg, IL May 2015- July 2015.

IT Intern

- Wrote Bash and Perl scripts to query tables with SQL and produce reports with vehicle information for clients such as Toyota and BMW.
- Assisted in transitioning between two Linux server by writing scripts to migrate files while performing Server upkeep.
- Engaged in Scrum meetings while observing inter departmental relations and providing technical insight.

SKILLS

Programming languages: C#, C, HTML, CSS, JavaScript, SQL, Bash.

Web Frameworks: ASP.NET, Bootstrap.

Development Tools: Visual Studio, MS SQL Server, TFS, Git.

EDUCATION

University of Illinois at Chicago (UIC) December,
2015, Bachelor of Science in Computer Science.

PROJECTS

- A semester long Project of adding functionality to XV6, an operating system for x86 Processors based on the linux kernel, including making a boot splash screen, implementing page eviction, adding multi-threading support. C, Assembly.
- Netflix Database Application . Developed an N-Tier application using Object-oriented principles for querying a sample Netflix database. C#.NET, SQL, F#.

LANGUAGES

Hebrew - Native proficiency

Russian - Working knowledge
